Kitchens & Islands

Belgard Custom Kitchen Series

As outdoor living continues to grow in popularity, so does the complexity of outdoor kitchens. We are excited to announce that we now have a solution for creating elaborate and customizable outdoor kitchens. These kitchens are available in either pre-designed configurations or in modular cabinet form – similar to how an interior kitchen would be designed. All kitchens feature granite aggregate polished counter top inlays. Each pre-designed kitchen is shown with a list of stainless components. All the components are manufactured by OCS and are available through your local OCS (MediumRare) representative*. In the following pages, you will first see our four kitchen series. Each series features five-six examples of outdoor kitchens in progressively larger sizes and features. The series are divided into the following groups:

-100 Series (Straight)

-200 Series (45 Degree)

-300 Series (L Shapes)

-400 Series (U Shapes)

All pre-designed kitchen examples are shown with Urbana accents. Keep in mind, however, that accents (4" Banding and Insets) are available in the following choices: Urbana, Mega Lafitt, Old World, Hollandstone or Arbel (insets only). Also, all units are available with Dublin Cobble, BelAir Cap, or Weston Stone Cap (not available for counter coping) coping and foot rail. Please note that kitchens are priced as shown with the options in each example.

NOTE: BASE PRICE DOES NOT INCLUDE ANY BANDING, INSETS, OR COPING UPGRADES.

WESTON STONE CAP IS STANDARD FOR BAR LEDGE COPING AND DUBLIN COBBLE IS STANDARD FOR FOOT RAIL AND COUNTER TOP COPING. PLUMBING AND ELECTRICAL ARE NOT INCLUDED AND MUST BE DONE ON SITE.

Note: All these kitchens and modular components will be available on Google Sketch Up Warehouse (keywords Harmony Outdoor Living or Belgard), if you'd like to download them and incorporate them (to scale) within your designs.

*Lucullan components (by Medium Rare) may also be incorporated upon request.

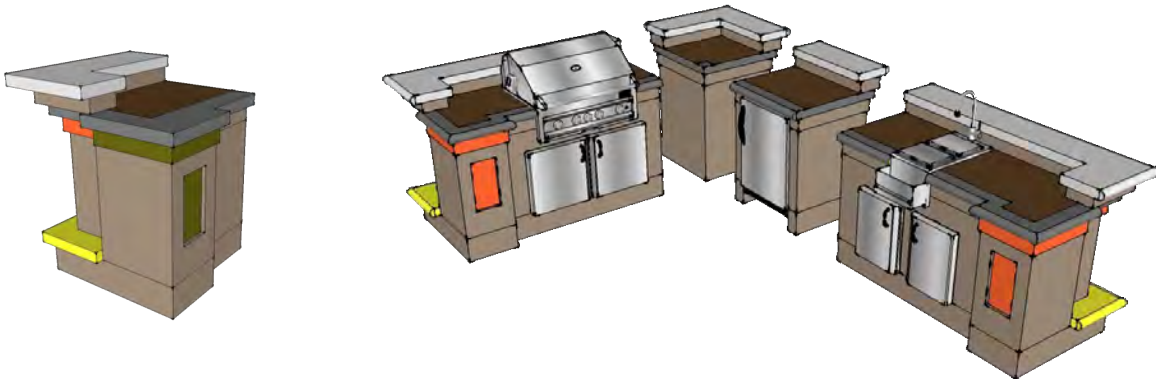

Kitchens & Islands

Modular Kitchen Components

After the Pre -Designed Kitchen Series section you will find the individual Modular Kitchen Components themselves. Feel free to let your creativity run wild and mix and match the different components. Keep in mind, you must always have an End Cap, Brick Oven, or Fireplace, on each end of the kitchen. In between you can create endless configurations using corners, 45s, and filler cabinets. Be sure to also check out some of the specialty cabinets, such as wine racks, refrigerator cabinets, and niches. All components feature granite aggregate polished counter top inlays. Also, each component will show what the maximum cutout is for a grill or top unit, and the maximum dimension for any doors or drawers. Each component is color-coded to show the upgrade options available for banding, insets, coping, and foot rail.

When creating an outdoor kitchen, it is critical that you contact us directly to ensure that all the stainless components and configurations are possible. We will convert your concepts to a 3D full color rendering to ensure that you are getting exactly what you want.

NOTE: BASE PRICE DOES NOT INCLUDE ANY BANDING, INSETS, OR COPING UPGRADES.

WESTON STONE CAP IS STANDARD FOR BAR LEDGE COPING AND DUBLIN COBBLE IS STANDARD FOR FOOT RAIL AND COUNTER TOP COPING. PLUMBING AND ELECTRICAL ARE NOT INCLUDED AND MUST BE DONE ON SITE.

Note: All these kitchens and modular components will be available on Google Sketch Up Warehouse (keywords Harmony Outdoor Living or Belgard), if you'd like to download them and incorporate them (to scale) within your designs.
